FABIAN ROJAS UGALDE

Software Developer

Costa Rica | +506 8555-6051 | rojasugaldefabian@gmail.com | linkedin.com/in/fabian-rojas-ugalde | github.com/fabian-rojasu

PROFESSIONAL SUMMARY

Computer Engineering graduate from Tecnológico de Costa Rica with hands-on experience in backend and web development. Skilled at building APIs with Node.js, Python/FastAPI, and C#/.NET, and web applications with React and Vue. Seeking a software developer role to contribute to impactful projects.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, C#, Java, SQL, HTML/CSS
Backend: Node.js, FastAPI, ASP.NET Core, .NET 8, REST APIs
Frontend: React, Vue, Angular, Blazor
Databases: PostgreSQL, SQL Server, Firebase
DevOps & Tools: Git, Docker, NGINX, Linux, Postman
Spoken Languages: Spanish (Native), English (Professional Working Proficiency)

PROFESSIONAL EXPERIENCE

Backend / Web Developer (Professional Graduation Internship) — Softland *Jun 2025 – Dec 2025*
C#, ASP.NET Core, .NET 8, Blazor, DevExpress

- Migrated the Alerts module of the Softland ERP from legacy .NET Framework to a Blazor web application on ASP.NET Core/.NET 8, modernizing a module used across the company's enterprise client base.
- Built a secure, cross-platform web application with C#, .NET 8, and DevExpress 24.2, replacing a desktop-only legacy interface.
- Engineered a database-driven REPX report management system, removing file-based report storage and reducing report deployment effort by an estimated 30%.

Backend Developer — Fundación Plan21 *Jan 2022 – May 2023*
REST APIs, relational databases

- Developed backend endpoints for an agricultural management platform supporting land-use planning and planting-time estimation for multiple farms.
- Built API functions to calculate crop carbon footprint and evapotranspiration, supporting data-driven irrigation and planting decisions.

PROJECTS

Health Data — Full-Stack Health Dashboard *Oct 2024 – Dec 2024*
React, FastAPI, Python, JavaScript, HTML/CSS

- Built a health data dashboard visualizing metrics from wearables, smart shoes, and connected scales using a component-based React frontend.
- Designed and implemented RESTful FastAPI services to ingest, store, and query health data, powering real-time interactive chart rendering.

Distributed Chat System — Real-Time Messaging Platform *Oct 2024 – Nov 2024*
Vue, TypeScript, Node.js

- Built a distributed real-time chat system with encrypted messaging, multimedia sharing, message synchronization, and scheduled content autodestruction.
- Implemented user authentication, session and profile management, and activity tracking within a distributed architecture.
- Added bot-driven automation features such as reminders and weather updates.

EDUCATION

B.Sc. in Computer Engineering — Instituto Tecnológico de Costa Rica (ITCR) *2022 – 2025*
Associate Degree in Computer Support — CTP de San Carlos *2018 – 2020*
Certifications: Cisco CCNA 1 & CCNA 2 · Cisco IT Essentials · Cisco: Introduction to Cybersecurity
